

X-Y SLIDES

MANUAL

We design and manufacture a range of manual and motorized slides used to hold and provide fine precise movements for adjusting of the welding heads in automated welding systems . The slides are available in various capacities from small size (4 kg) having fine step of the screw used in TIG / MIG process to larger sizes of 70Kg load bearing capacity used in the submerged arc process .

Lengths available for linear movement from 50 mm right upto 325 mm . Special slides can be made for lengths more than this if required .

The slides can be fitted to give 1, 2 or 3 axis moment to the welding head depending on the welding process and job requirement . The slides provide precise back lash free movements providing much needed versatility and innovativeness in the welding shop increasing productivity and ensuring repeatable high quality welds in the most difficult jobs .

Accessories for welding head fitting like torch mounting clip, spinning flange , tilting arrangement and the setting up flange are available .

MOTORIZED

Welding Automation Range of Products : • Welding Gun • Oscillator (weld weaver) • Cold wire feeders • Seam trackers • AVC • Cameras and video displays • X-Y slides (manual and motorized) • Welding turntables • Welding positioners • Welding Turning Rolls • Welding lathes • Column and boom (manipulators)
